Welcome to the dark side of writing, a process that encourages writers to examine their own darkness of pain and suffering in order to achieve the benefits derived from self-exploration.

Why do it? Uncovering the dark soul (where pain and fear hide), releases a treasure chest of creativity, the gold of truth for both fiction and nonfiction writers. The best art comes from truth-modified through fiction-but truth nonetheless.

How is it taught? The class format will incorporate methods of role-playing, in-class assignments, and dream work to push beyond the blocks and dip into the black ink of imagination.

What do people say about the course?

"You opened doors and trod where we had feared to tread-and you did it well." May Waldroup, former owner, Thunderbird Bookshops, Inc.

"You took us to places that were different and daring. More, more, more." Marnie Sperry, student
